TECHNICAL REFERENCE GUIDE

**TOGETHER WE MAKE
THE DIFFERENCE**

Dear Valued Partner,

I am pleased to present you the newest and most up to date EPSI Technical Reference Guide. In it, you will find the EPSI products you have come to rely on, as well as a number of new innovative products from our masking experts. Please keep in mind that this is only a partial offering of the over quality 2,000 quality products we offer.

In addition to our standard parts, we have a team of dedicated engineers who will design custom parts for your specific masking needs. With over 235 combined years of masking experience, our dedicated team of experts will assist you in whatever project you have, be it large or small. You ask it, we mask it.

I am also pleased to announce that EPSI is now conducting onsite masking audits. Your local EPSI representative will time your line, assess your line density and calculate savings based on a variety of different masking solutions. Our onsite masking audit is just one more way we are committed to you, our customer.

Our guarantee to you is to increase your profitability through unmatched quality, superior supply chain, constant innovation, and services and programs that are meaningful to your bottom line. With our eight domestic and multiple global locations, we are closer than you think and will be there to support you in all your masking needs.

For up to date pricing and product offerings, please contact your local EPSI representative or visit us at www.epsi.com.

Sincerely,

A handwritten signature in black ink, appearing to be "J. [unclear]", with a long horizontal line extending to the right.

President

TOGETHER WE MAKE THE DIFFERENCE

866.ASK.EPSI • www.epsi.com

EPSI provides consistent, exceptional masking and hanging solutions you can count on! Guided by our core values, EPSI also provides the best customer service experience by utilizing the steps of our proven process.

EPSI'S PARTNERSHIP PROGRAM

Communication and availability is key for a successful partnership! We take pride in servicing local and national accounts across the globe, with our 50+ strong team of technical sales reps, regional managers, and our VMI program. We make your life easy with personal service, forecasting your inventory, and providing insight on competition with our industry intelligence.

Our technical field reps have immediate market access to help provide you with the products and programs that you need to stay on top of innovation, save on cost, and ensure on-time delivery. We do more than taking your order, we are committed to your success, and always available when you need us; when we say local service, we mean it! Here are some of our Partnership Program incentives we offer to make it easy to work with EPSI!

Flash Sale Access	Volume & Quantity Incentive	Blanket Order Rewards	Referral Rewards
Receive an all access pass to our flash sales that we run throughout the year	Save when you purchase additional quantities of the same part number for the same order	Receive additional savings when you sign up for blanket orders!	Get savings when you refer new business to EPSI
Pay Early & Pay in Full Incentives	Payment Term Incentives	Go Custom & Save!	Price Match Program
Receive additional savings when you pay early and/or in full	Take advantage of longer or better payment terms as you build your relationship with EPSI	Go custom with EPSI and save on tooling fees!	Provide proof of recent competition's pricing and we will PRICE MATCH!
New Product & Program Incentives	Reduced Restocking Fee	Savings on G Items	Premier VMI Set Up
Receive savings and incentives on new products & programs EPSI rolls out!	Save on restocking fees on select Partnership levels	Receive additional savings when you purchase Guaranteed items	Joining our VMI program? Receive Premier VMI Set Up on select Partnership levels
Early Access to New Products, Programs, & Promotions	Shipping Incentives	The More You Spend, The More You Save	AND MORE!
Receive first access on new EPSI products, programs and sales/promotions on select Partnership levels	Receive BIG savings on shipping starting at the Platinum Membership Level	Receive additional savings when projected annual spend is exceeded!	

Some restrictions may apply. Application may have to be submitted for select incentive programs (example: Payment Terms). Program details can change at any time as we are continuously striving to improve our program to meet the needs of our customers.

PROGRAMS & SERVICES

Our commitment to you, our partner, is to increase your profitability through unmatched quality, superior supply chain, constant innovation, and services and programs that are meaningful to your bottom line.

For that reason, EPSI is proud to bring you our Partnership Program. Not only will you experience competitive market-based prices, you will also receive added value through EPSI's innovative services and newly added incentives.

Learn more about our On-Site Masking Audit, VMI Program, Rapid Prototype Programs, Custom Plotter, Custom Mold Program, AND MORE!

CUSTOMS

The EPSI Guarantee means that we provide you with the best solutions for your masking needs. Sometimes that solution is one of our guaranteed products, but other times you need a custom solution. Our in-house engineering teams has decades of experience in working with customers to produce a solution fit to your precise needs. We continue to lead the industry in creating efficient, custom solutions for diverse applications.

We are the masking experts and we have calculated the point where customers will realize savings using a custom mold or custom tape mask verses masking with standard products.

Your EPSI sales representative can help you estimate your savings and determine whether a custom product is the right solution for you.

That's the EPSI guarantee!

PARTNERSHIP PROGRAM

Communication and availability is key for a successful partnership! We take pride in servicing local and national accounts across the globe, with our 50+ strong team of technical sales reps, regional managers, and our VMI program. We make your life easy with personal service, forecasting your inventory, and providing insight on competition with our industry intelligence.

Our technical field reps have immediate market access to help provide you with the products and programs that you need to stay on top of innovation, save on cost, and ensure on-time delivery. We do more than taking your order, we are committed to your success, and always available when you need us; when we say local service, we mean it!

Refer to PAGE 2 for a list of our Partnership Program incentives!

VMI - VENDOR MANAGED INVENTORY

Today many EPSI customers enjoy the benefits of our Vendor Managed Inventory (VMI) program. The high price of procurement demands that they embrace a more efficient process, one that reduces total cost and creates value. EPSI's supply chain and logistics team will help map your existing processes, analyze work functions and recommend changes and improvements. The resulting strategies help drive profitability.

With EPSI as your partner, the products, services and people you need are as close as our nearest branch. We tailor our inventory to meet your requirements. Our expertise in storeroom and inventory management will enable you to eliminate duplicate, excess, and obsolete products.

We do more than just take your order, we work closely with you – like an extension of your internal resources – to solve your specific inventory challenges. EPSI's VMI program allows you to focus on your competencies while reducing inventory levels, freeing up cash flow and saving time.

Reasons to join our VMI Program:

- On-site masking expertise
- Zero stock outages
- Free inventory bins and shelving
- Instant delivery
- No freight charges
- Reduction in inventory SKUs
- No shut-down time for lack of masking
- Ease of doing business
- Free inventory maintenance
- No duplicate inventory items
- Reduced cost of doing business
- Just in Time (JIT) inventory

Program includes free 3' x 5' shelf, 12 inventory bins and initial setup. A \$5,000 Value – FREE! *

*Customer must be on a minimum of Silver 3 Partnership Level. Estimated annual savings include projected savings from freight, procurement costs, inventory management, maintenance, setup, bins, shelving, etc

RAPID PROTOTYPE PROGRAMS

3D Printing technology gives EPSI the ability to print rubber-like and plastic prototypes in different durometers. With this technology, we can simulate our custom rubber solution in days rather than weeks. Being able to test for form and fit gives you the confidence to proceed directly to production, saving precious time.

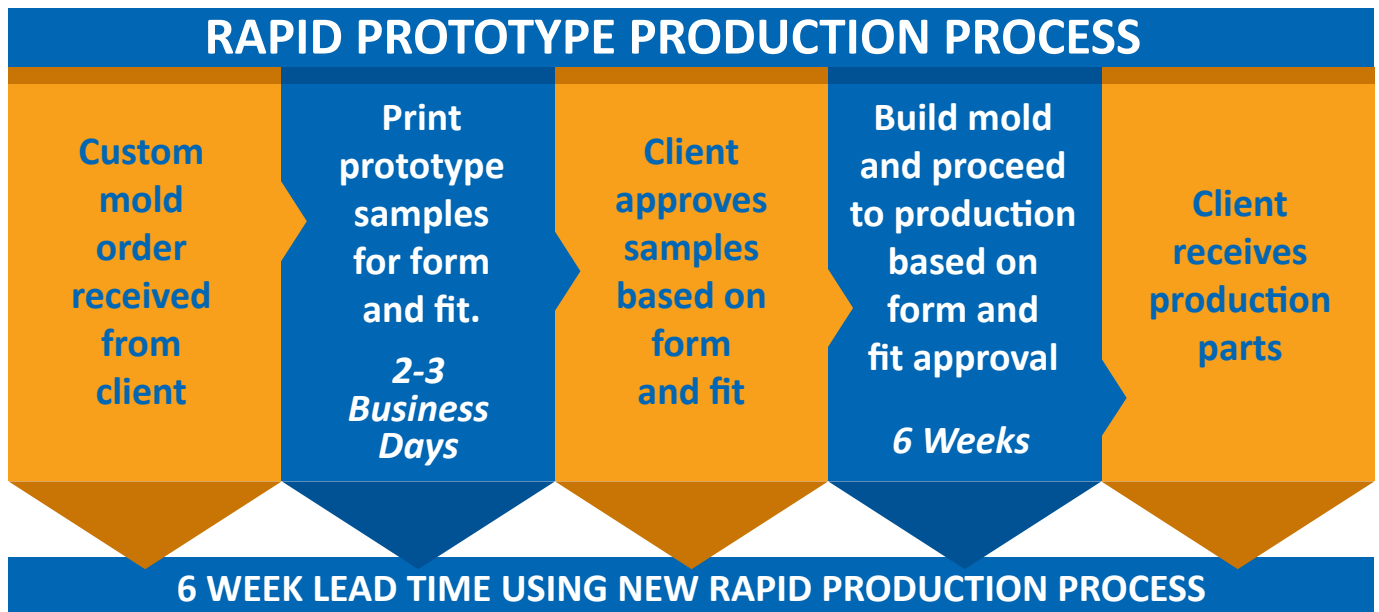

RAPID PROTOTYPING BENEFITS

- Prototypes for "form and fit" test in 2-3 days
- Ability to go straight to production
- Production parts in as little as 6 weeks
- Cut time for a custom mold program by 50%
- Reduce overall cost of custom solutions
- Reduces downtime - you're up and running quicker

RAPID PROTOTYPE PRODUCTION PROCESS

NOW AVAILABLE!

SILICONE RAPID PROTOTYPE PROGRAM

Go beyond just form & fit prototypes.

EPSI has created a process by which we can produce prototypes for form, fit and function in as little as 3 business days. This means not only can you test for fit, you can run them through high temperatures as well.

The benefits of Silicone Rapid Prototypes include speed, cost, and approximation to the final part design, including material properties and dimensions.

Contact your Technical Sales Representative for pricing & lead times.

YOU ASK IT.
WE MASK IT.®

ON-SITE MASKING AUDIT

Are you ready to solve your biggest masking pains?

With our Complimentary On-Site Masking Audit, we'll be right there with you to identify, assess and calculate your return on investment.

Our Technical Sales Representative will meet with you, our partner, to learn about your needs, goals, expectations and greatest masking pains, including removal and rework. We will conduct our on-site masking audit and enter the timing information into our Masking Audit Calculator. This innovative formula, designed by our experienced Engineering team, will help determine the best masking solutions and your savings.

Our On-Site Masking Audit is just one more way we are committed to you, our customer.

CUSTOM MOLD PROGRAM

ARE YOU SPENDING TOO MUCH ON MASKING LABOR? IS YOUR LINE SPEED SUFFERING BECAUSE OF COMPLICATED MASKING? IF SO, A CUSTOM MOLD FROM EPSI IS JUST WHAT YOU NEED!

The EPSI Guarantee means that we provide you with the best solutions for your masking needs. Sometimes it's one of our guaranteed in-stock products like our Flex-Tite countersink pull plugs (CPP) or patented Liqui-Tite plugs (LTP™). Other times, it means a custom solution. Only EPSI can provide you with the perfect custom piece with the speed and savings you need to keep things moving.

Our in-house engineering team has over a decade of experience in partnering with our customers to produce tens of thousands of custom silicone masks. We continue to lead the industry in creating efficient, custom solutions for diverse applications.

Here at EPSI, we begin the custom silicone mask process by getting all pertinent information from the customer (drawings, samples, etc.) and then discuss the best masking method to use. We'll develop the design and convey the idea to our customers with drawings (three dimensional PDFs, verbal descriptions) and arrive at a final design that will, in the end, save the customer time and money in their finishing process.

Go Custom with EPSI & SAVE!

THE EPSI CUSTOM MOLD PROGRAM

- ✓ **THE EPSI GUARANTEE:** Your Mold Works or We Fix It Free!
- ✓ Expert Consultation with a Design Engineer
- ✓ Application Analysis for Your Custom Mold
- ✓ CAD Drawings Created to Your Specifications
- ✓ Fast Quoting Process Reduces Down Time
- ✓ Simple Order Setup Makes Reordering Easy
- ✓ Dedicated Customer Service Rep from Start to Finish
- ✓ Liaison to Factory for Manufacturing
- ✓ Production Monitoring and Reporting

AVERAGE SAVINGS*

PIECES	SAVINGS
1,000	\$660
1,500	\$990
2,000	\$1,320
2,500	\$1,650
3,000	\$1,980
3,500	\$2,310
4,000	\$2,460
4,500	\$2,970
5,000	\$3,330

*Based on less complex, high-volume masks. Break-even point is approximately 1,900 masks. Time savings are even greater on more complex masks, resulting in exponentially higher savings.

MASK BY HAND v. CUSTOM

These control panel housing covers took 30 minutes to mask by hand.

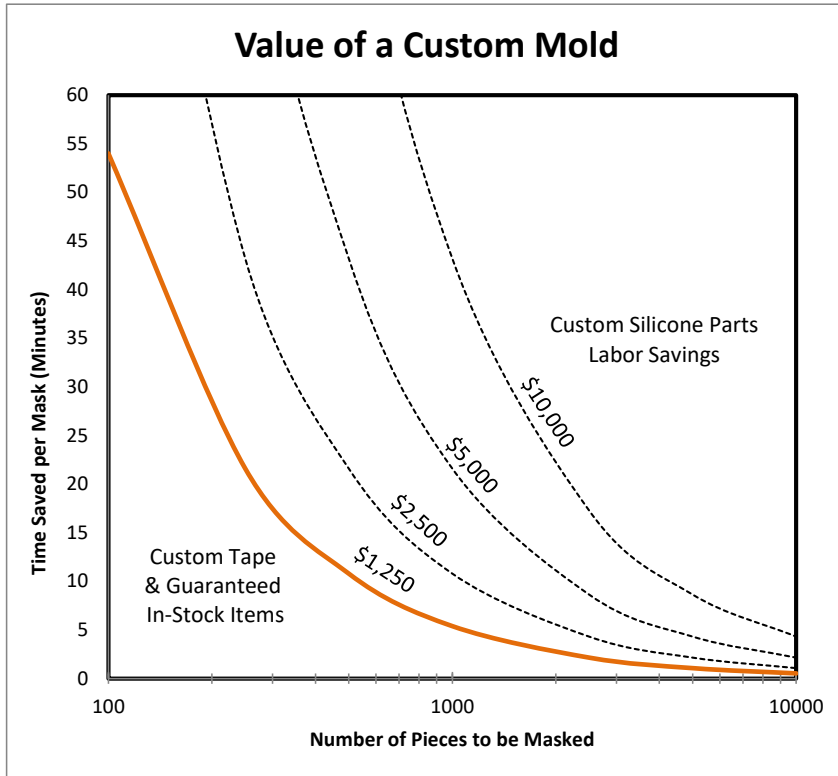

The EPSI Custom Mold solution masked them in less than two minutes.

TOTAL SAVINGS: \$20,000.

SAVE TIME, SAVE MONEY!

**YOU ASK IT.
WE MASK IT.®**

WHAT CAN CUSTOM SAVE ME?

Estimating your savings is easy!

Step 1: Determine the total number of masks for your project.

Step 2: Calculate the time saved per mask with a custom mold. A 90% time savings is typical.

Step 3: Plot the point on the graph that corresponds to your time saved and piece quantity.

If your point is to the right of the orange line, you will save time and money with a custom mold solution. As you can see, the further to the right, the greater savings you can expect.

If your point falls to the left of the orange line, our custom tape program or one of our guaranteed in-stock items could provide the best solution.

CASE STUDIES

Number of Parts: 5,000
Time Saved per Mask: 4.5 min.
Total Savings: \$5,600

Number of Parts: 10,000
Time Saved per Mask: 1.3 min.
Total Savings: \$3,300

Number of Parts: 5,000
Time Saved per Mask: 1.5 min.
Total Savings: \$1,875

Number of Parts: 2,000
Time Saved per Mask: 9.0 min.
Total Savings: \$4,500

Number of Parts: 3,200
Time Saved per Mask: 1.6 min.
Total Savings: \$1,265

Number of Parts: 2,200
Time Saved per Mask: 3.3 min.
Total Savings: \$1,830

CUSTOM PLOTTER PROGRAM

The EPSI Guarantee means we provide you with the best solution for your masking needs. Frequently, it's guaranteed in-stock products like our A12 green tape or our patented Wishbone™ discs. But, occasionally only a custom shape will do and only EPSI can provide these custom pieces as quick and affordable as standard masking products.

Plotter cutting is a highly customized and economic process for quickly developing custom solutions for complicated masks and irregular shapes. Additionally, EPSI can set whole sets of plotter cut masks on a single roll, reducing masking time and labor costs.

Use this guide to determine the tape and number of rolls you require based on the size and quantity or the part to be masked. Our engineering team, with years of experience designing custom shapes and masking products, will design and produce your custom solution based on your parts and/or drawings. Next, our computer-controlled plotter cutter will quickly produce your custom tape solution, giving you a perfect mask every time.

INSTRUCTIONS

1 Use the grid on the right to estimate how many die cut pieces you can expect to receive on a roll. You can turn a mask in any direction, duplicate a mask multiple times in the work area and combine different masks to make a kit.

2 Send us your PO along with:

- The selected tape
- Your estimated piece count per roll
- Your preferred shipping method
- Indicate clearly what you want to mask on one of the following:
 - 3D CAD model in: STEP, DXF, or IGES format
 - A detailed engineering print
 - An existing sample die cut
 - A sample part to be masked

3 Your masking requirements will be analyzed and the best fit on the tape roll will be developed. Our design engineers will process your order and send you a confirmation. You can expect to have your custom plotter cut masking shipped to you within one to two business days of receipt of confirmation.

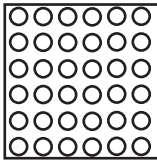

That's the EPSI Guarantee!

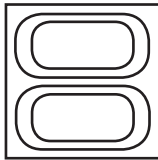

One Three-Piece Kit

One Four-Piece Kit

36 Identical Masks

Two Identical Masks

The size of your mask determines how many pieces per roll you will receive. Larger masks allow for fewer pieces per roll, and smaller masks allow for more. Careful arrangements sometimes allow for an increased number of pieces. Try laying out a paper template of your mask on the grid to the right to help determine how many pieces you can get per roll.

TAPE DESCRIPTIONS

C21

- Maximum Temperature: 325° F
- High-Temp Rubber Adhesive
- Tough, Smooth Crepe Paper Carrier
- Tear Resistant & Solvent Resistant
- Straight, Clean Pain Lines
- Standard Usable Width 8" (Opt. 11")

O12

- Maximum Temperature: 430° F
- High-Temp Silicone Adhesive
- 2.0 mil PET Carrier
- 3.2 mil Total Thickness
- Clean Removal, No Residue
- Standard Usable Width 8" (Opt. 11")

A12

- Maximum Temperature: 400° F
- High-Temp Silicone Adhesive
- 2.0 mil PET Carrier
- 3.4 mil Total Thickness
- Clean Removal, No Residue
- Standard Usable Width 8" (Opt. 11")

K22

- Maximum Temperature: 500° F
- High-Temp Silicone Adhesive
- 2.0 mil Polyimide Carrier
- 3.5 mil Total Thickness
- Clean Removal, No Residue
- Standard Usable Width 8"

USE THIS GRID TO ESTIMATE THE NUMBER OF PIECES PER ROLL

FOR EXAMPLE:

If each piece is about 1X1" you'll get up to 3,000 masks.

If each piece is about 3X3" you'll get about 350 masks.

If each piece is about 5X5" you'll get about 125 masks.

If each piece is about 8X8" you'll get about 50 masks.

CAPS

EPSI's versatile line of caps are the industry standard for masking solutions. Confidently cover threaded or non-threaded studs, extrusions, dowels, corners, and so much more. EPSI caps also double as plugs to cover tapped holes, irregular contours and threaded holes. Caps are offered in EPDM, vinyl and durable, reusable, high-temp silicone. Choose from a variety of colors for easy identification on your masking line.

VINYL CAP	VC	13
EPDM CAP	EC	16
SILICONE CAP	SC	19
CONE CAP	CONE	16
CON CAP	CONS	16
WASHER CAP	WC	25
EASY CAP	EZY	27
FLANGED CAP	FCS	29
FLANGED SILICONE CAP	FSC	30
MULTI LENGTH CAP	MLC	32
MULTI BALLOON MASK	MBM	33
RECTANGLE CAP	RC	34
CAP STARTER KITS	KIT	35

CUSTOMS

The EPSI Guarantee means that we provide you with the best solutions for your masking needs. Sometimes that solution is one of our guaranteed products, but other times you need a custom solution. Our in-house engineering teams has decades of experience in working with customers to produce a solution fit to your precise needs. We continue to lead the industry in creating efficient, custom solutions for diverse applications.

We are the masking experts and we have calculated the point where customers will realize savings using a custom mold or custom tape mask verses masking with standard products.

Your EPSI sales representative can help you estimate your savings and determine whether a custom product is the right solution for you.

That's the EPSI guarantee!

VC SERIES - VINYL CAPS

212°F (100°C)

PRODUCT DESCRIPTION

EPSI's Vinyl Cap (VC) series are an economical alternative to Silicone and EPDM which can be used as either a cap or as a plug. The flexibility of vinyl makes it easy to install while the airtight seal that they provide keeps them in place once they are on. The flexibility also makes them more resistant to tearing and shredding. Vinyl Cap (VC) series can be used for applications from high temperature masking to protecting parts from debris & contamination during shipping

HELPFUL HINTS

- When sizing, ID of cap should be 5-7% smaller than OD of stud

TYPICAL APPLICATIONS

Can be used in low temp applications or removed/applied prior to dry-off/cure stages in hi-temp applications, protect studs during shipping

TECHNICAL DIAGRAM KEY

- ID Inner Diameter
- OD Outer Diameter
- IL Inner Length

EC SERIES - EPDM CAPS

475°F (245°C)

PRODUCT DESCRIPTION

Our EPDM Cap (EC) product line is the industry standard for low cost masking applications. Their versatile nature allows them to fit over extrusions, threaded studs, PEMS and dowels, as well as be used as a plug for tapped holes, irregular contours and threaded holes. Our high temperature EPDM is specially formulated for chemical resistance and ensures reusability and economy during masking

TYPICAL APPLICATIONS

Used as a cap over threaded studs, dowels and protrusions.
Used as a plug for tapped holes, irregular contours and threaded holes

HELPFUL HINTS

- When sizing parts as a cap, the ID of the cap should be 2 - 3% smaller than the stud diameter
- To ensure easy removal, select a cap length that is slightly longer than the masking length of the stud. This is especially important if the cap ID is less than 4% of the stud diameter
- When sizing parts as a plug, the OD should be at least 6% larger than the hole diameter
- If used to cover tube ends in powder coating, a small slit in the top of the cap will prevent blow-out. (See EZY™ Caps)
- Economical enough to be used one time in high temperature applications or where the cap will be used during shipping after coating process
- Can be Used as Both a Cap and as a Plug
- EPDM Caps are Reusable and Have Excellent Chemical Resistance
- Round Top Profile Allows for Easy Insertion into Holes
- Flexible Enough to Conform to Irregular Geometry
- Can be Used as Both a Cap and as a Plug
- EPDM Caps are Reusable and Have Excellent Chemical Resistance
- Round Top Profile Allows for Easy Insertion into Holes
- Flexible Enough to Conform to Irregular Geometry

SC SERIES - SILICONE CAPS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Silicone Cap (SC) product line is the industry standard for general masking applications. Their versatile nature allows them to fit over extensions, threaded studs, PEMS and dowels, as well as be used as a plug for tapped holes, irregular contours and threaded holes. Our high temperature silicone is specially formulated for reusability

TYPICAL APPLICATIONS

Used as a cap over threaded studs, dowels, and protrusions. Used as a plug for tapped holes, irregular contours and threaded holes

CAUTION: Due to the low tear resistance of silicone, do not use pliers or other sharp tools for removal. (See EC Caps for higher tear resistance caps)

HELPFUL HINTS

- When sizing parts as a cap, the ID of the cap should be 2 - 5% smaller than the stud diameter
- To ensure easy removal, select a cap length that is slightly longer than the masking length of the stud. This is especially important if the cap ID is less than 5% of the stud diameter
- When sizing parts as a plug, the OD should be at least 7% larger than the hole diameter
- If used to cover tube ends in powder coating, a small slit in the top of the cap will prevent blow off. (See EZY™ Caps)
- Can Be Used as Both Cap and as a Plug
- Flexible Enough to Conform to Irregular Geometry
- Round Top Profile Allows for Easy Insertion Into Holes
- Silicone Caps are Reusable and Will Not Melt or Harden
- Color Coded for Increased Visibility and Easy Sorting During Reuse

CON SERIES - CONE & CONS CAPS

475°F (245°C) / 600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Cone Cap (CON) product line is an alternative to our Washer Cap (WC) product line when masking off holes or studs and a surrounding surface for grounding. Their versatile nature allows them to fit over extrusions, threaded studs, PEMS and dowels, as well as to be used as a plug for tapped holes, irregular contours and threaded holes. Our high temperature silicone (CONS) is specially formulated to ensure stability at elevated temperatures, ensuring reliable masking with every part. Our high temperature EPDM (CONE) is specially formulated to be chemically resistant and ensures reusability and economy during masking

TYPICAL APPLICATIONS

Used as a cap over threaded studs, dowels, and protrusions. Used as a plug for tapped holes, irregular contours and threaded holes

HELPFUL HINTS

- Versatile enough to be used as caps, stoppers or plugs in any variety of applications
- When sizing parts as a cap, the ID of the cap should be 2 - 5% smaller than the stud diameter
- To ensure easy removal, select a cap length that is at least 1/4" longer than the masking length of the stud. This is especially important if the cap ID is less than 5% of the stud diameter
- Conical Profile Allows for Easy Insertion as a Plug
- Washer Feature Creates a Grounding Area Around Holes and Studs
- Will Fit Multiple Diameter Threads When Used as a Cap
- Flexible Enough to Conform to Irregular Geometry and Great For Square Holes
- Silicone Cone Caps are Reusable, and Will Not Melt or Harden
- When sizing parts as a plug, the MJD (major diameter) should be 2 - 5% larger than the ID of the hole you are plugging

WC SERIES - WASHER CAPS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Washer Cap (WC) product line is the clear choice when masking off holes or studs and the surrounding surfaces for grounding. Their versatile nature allow them to fit over extrusions, threaded studs, PEMS and dowels, as well as to be used as a plug for tapped holes, irregular contours and threaded holes. Our high temperature silicone is specially formulated to ensure stability at elevated temperatures

TYPICAL APPLICATIONS

Used as a cap over threaded studs, dowels and protrusions. Used as a plug for tapped holes, irregular contours and threaded holes. The washer feature creates a grounding area around holes and studs

HELPFUL HINTS

- For other washer diameters, EPSI can die-cut a silicone foam donut shaped washer or donut tape die-cut to be used under the cap
- SC-series caps can be nested inside the washer cap to create smaller ID's
- Can Be Used as Both a Cap and as a Plug
- Washer Feature Creates a Grounding Area Around Holes and Studs
- Flexible Enough to Conform to Irregular Geometry
- Washer Feature Creates Area Free from Powder for Assembly Purposes
- When sizing as cap select an ID that is 2-3% smaller than the stud
- When sizing as a plug select an OD that is 5-7% larger than the hole

EZY SERIES - EASY CAPS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Easy Cap (EZY™) product line is the best choice when masking off threaded studs or protrusions. Many EZY™ caps are molded with an air vent, which acts as a relief valve for applications where internal pressure is a problem. All EZY™ caps feature an oversized head and a unique internal gripping design, which makes application and removal easy.

TYPICAL APPLICATIONS

Use as a cap over threaded studs, dowels and protrusions or as a plug for larger bores and through holes.

HELPFUL HINTS

- If internal pressure is causing blow-offs, place a slit in or remove the nipple. This will allow for venting of internal pressure. (Not recommended for immersion coatings)
- Due to the internal ring, a much smaller ID can be used compared to a standard cap
- Size at least 10% less than the stud OD
- EZY™ Caps are Ideal for Large Diameter or Long Length Products
- Specially Designed Internal Ring Allows for Easy Placement and a Liquid-Tight Seal
- Oversized Head for Easy Removal
- Many Sizes Available with Built-in Air-Vent to Eliminate the Effects of Pressure Build-Up
- EZY™ Caps are Reusable and Will Not Melt or Harden
- EZY™ Caps Offer Fine Line Masking

HERE'S WHY YOU SHOULD USE EPSI'S EZY

Cut here if venting is needed

Oversized head and limited friction (gripping ring) make for quick masking & de-masking

FCS SERIES - FLANGED CAPS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

FCS caps are ideal for masking around lead-in chamfer of threaded holes. hollow design ensures easy insertion. Use in conjunction with a dowel or other insertion tool for easy application. FCS caps are reusable and will not melt or harden

TYPICAL APPLICATIONS

Used as a plug in threaded holes and chamfered holes. Can also be used as a substitute for an equivalent silicone cap

HELPFUL HINTS

- Alternative to many Silicone Cap (SC) sizes
- When sizing parts as a cap, the ID of the cap should be 2 - 5% smaller than the stud diameter

FSC SERIES - FLANGED SILICONE CAPS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Flat Silicone Cap (FSC) product line is an alternative to our Silicone Cap (SC) product line for capping applications. Their versatile nature allows them to fit over extrusions, threaded studs, PEMS and dowels. Our high temperature Silicone is specially formulated for reusability and economy during masking

TYPICAL APPLICATIONS

Use as a cap over threaded studs, dowels and protrusions. Can also be used as a plug for larger bores and through holes.

HELPFUL HINTS

- Alternate to many Silicone Cap (SC) sizes
- When sizing parts as a cap, the ID of the cap should be 2 - 5% smaller than the stud diameter
- Reduces Creepage in Applications Where Temperature Changes Rapidly
- Flexible Enough to Conform to Irregular Geometry
- Flat Top Aids Application and Minimizes Air Trap
- Flat Silicone Caps are Reusable and Will Not Melt or Harden

MLC SERIES - MULTI LENGTH CAPS

600°F (315°C)

HELPFUL HINTS

- Convenient: They reduce inventory, take up less floor space, and require less logistics because one cap covers a multitude of stud or threaded stud lengths
- Durable: Made of durable, high temperature resistant silicone for repeated use
- Versatile: Each cap can replace between two and up to four standard silicone caps from the EPSI catalog
- Innovative: Installation & removal of the caps are facilitated by a generous handle
- When sizing as a cap, ID should be 5-7% smaller than stud

PRODUCT DESCRIPTION

The MLC caps are intended to mask the most common stud or threaded stud diameters, with one cap capable of masking various lengths of stud or threaded stud. They are intended to take the place of regular silicone caps

TYPICAL APPLICATION

Made for various stud lengths. Use where pressure build up and blow off need to be minimized. Minimize customer inventory

MBM SERIES - MULTI BALLOON MASK

600°F (315°C)

PRODUCT DESCRIPTION

MBM caps are made for especially difficult or unusually large geometry. They are a thin-walled disposable silicone cap that can withstand typical finish curing heat

TYPICAL APPLICATION

Conforms to irregular shapes, perfect for job shops. Thin membrane allows one cap to fit multiple diameters and profiles

HELPFUL HINTS

- An incredible stretch rate – 150%! That means so many more shapes and sizes can be masked with only one MBM
- Five balloon masks replace 30+ standard silicone caps
- The five balloon masks collectively stretch from ¾” to 17”
- Convenient: Easy to use – just slip it over a part
- Durable: Made of thin, soft, high temperature resistant silicone
- Innovative: During the hot curing process, the balloon masks will inflate before they pop off of the part being masked
- Perfect Fit: bead molded into the bottom of each cap allows for a tighter fit around the part being masked
- Fast & Easy: Very effective for relatively larger parts that aren’t necessarily round
- Undersize 10-15% to start
- Roll it up for easier application and removal

REC SERIES - RECTANGLE CAPS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

The thin, Rectangular profile of our REC cap is ideal for masking off bus bar terminals and other electrical contacts. Tapered collars around the opening ensures fine line masking. Grounded caps are reusable and will not melt or harden

HELPFUL HINTS

- When sizing, make sure inner length and width are undersized for tight fit

TYPICAL APPLICATIONS

Used as a cap over electrical connectors and rectangular extensions

EPSI's superior line of plugs allows you to mask all shapes and sizes of blind, through and threaded holes, as well as counter-bores and counter sinks. Our commitment to constant innovation means you'll spend less time applying masking and more time producing. Choose between EPDM, plastic, cork, vinyl or our durable, reusable silicone. Silicone plugs are also available in a variety of colors for easy identification.

EPSI makes masking easy!

CUSTOMS

The EPSI Guarantee means that we provide you with the best solutions for your masking needs. Sometimes that solution is one of our guaranteed products, but other times you need a custom solution. Our in-house engineering teams has decades of experience in working with customers to produce a solution fit to your precise needs. We continue to lead the industry in creating efficient, custom solutions for diverse applications.

EPP SERIES - EPDM PULL PLUGS

475°F (245°C)

PRODUCT DESCRIPTION

Our EPDM Pull Plug (EPP) product line is an extremely economical solution for threaded and non-threaded through hole applications. With many sizes available, holes from 0.050" to 2.250" in diameter can easily be plugged. Our high temperature EPDM is specially formulated to ensure chemical resistance while maintaining reusability and economy during masking

TYPICAL APPLICATIONS

Used as a plug for non-threaded and threaded through holes

HELPFUL HINTS

- When plugging a hole, make sure that the major diameter of the plug is larger than the diameter of the hole being plugged by at least 4%
- Keep in mind any interference issues created by the Pull-Tab exposure after the plug is inserted
- Not recommended for holes with a lead-in chamfer or a countersink that requires protection from paint. For these applications, EPSI recommends the Flex-Tite Pull Plug (CPP), the High Tensile Strength Weld Nut Pull Plug (GWPP) or the Washer Plug (WP) lines
- Chamfered Neck and Smaller Pull-Tab Diameter Aid Insertion
- When Pulled Through Holes, Large Diameter Compresses Until Released, Providing for a Tight Seal
- High Temperature EPDM Formulation is Extremely Chemically Resistant and Economical

SPP SERIES - SILICONE PULL PLUGS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

HELPFUL HINTS

- When plugging a hole, make sure the major diameter of the plug is larger than the diameter of the hole being plugged by at least 4%
- Be aware of any interference issues created by the Pull-Tab exposure after plug insertion
- Not recommended for holes with a lead-in chamfer or a countersink that require protection from paint. For these applications, EPSI recommends the Flex-Tite Pull Plug (CPP), the High Tensile Strength Weld Nut Pull PLUG (GWPP) or the Wash Plug (WP) lines

PRODUCT DESCRIPTION

Our Silicone Pull Plug (SPP) product line is the industry standard solution for threaded and non-threaded through holes in powder coating and E-coating applications. With many sizes available, holes from 0.050" to 2.250" in diameter can easily be plugged

TYPICAL APPLICATIONS

When Pulled Through Holes, Major Diameter Compresses Until Released, Providing for a Tight Seal. Chamfered Neck and Smaller Pull-Tab Diameter Aid Insertion. Custom colors available on orders of 10 bags or more

CBP SERIES - COUNTERBORE PULL PLUGS

600°F (315°C)

HELPFUL HINTS

- **Innovative:** One part does the work of two combining STS and SPP
- **Fast and Easy:** Having a 2-in-1 part makes it a lot quicker to mask
- **Versatile:** It works for various thicknesses on metal plates
- **Durable:** High temperature, high performance silicone great for repeated use

PRODUCT DESCRIPTION

EPsi's Bore-Tite™ (CBP) is a perfect alternative to using an STS (stopper) and SPP (pull plug) together. It comes in most common standard nominal English and metric counterbore sizes. This product makes for easy installation and removal using handle. Bore-Tite™ (CBP) is an ideal solution for masking counterbores from any finishing product including immersion. Use the product to effectively mask off counterbore heads and thru holes. Its flexible hollow head seals tightly against the counterbore wall

DWP & C-DWP SERIES - DOUBLE WASHER PULL PLUGS

600°F (315°C)

HELPFUL HINTS

- When plugging a hole, make sure that the plug diameter is larger than the diameter of the hole being plugged by at least 5%
- To insert plug, place long stem into hole. Pull through until flanges are securely positioned around your part. To remove plug, pull short stem in reverse direction
- Masks entry and exit threads simultaneously
- Designed for common metric threads
- Provides positive seal

PRODUCT DESCRIPTION

The DWP™ should be used where it is necessary to protect both an entry and exit hole and its surrounding washer area. The pull tabs allow for the plug to be easily pulled through for secure placement. This product is color coded for quick identification

CPP SERIES - COUNTERSINK PULL PLUGS

600°F (315°C)

HELPFUL HINTS

- **Innovative:** The best way to mask 82° / 90° / 100° countersink holes
- **Self-Sealing:** Crucial point first contact design ensures a liquid tight seal
- **Fast and Easy:** Pull tabs ensure easy application and removal
- **Durable:** High-grade silicone takes repeated use at high temperatures
- **Perfect Fit:** Designed by our experienced engineering team

PRODUCT DESCRIPTION

We heard you say that it's a hassle to stock multiple plugs for varying countersink holes when plating, anodizing, and e-coating. So we created the new EPSI Flex-Tite™ Countersink Pull Plug (CPP) with a crucial point first contact design and perfectly matched to the countersinks you're masking. We designed a full range of the most common sizes, with color coding for easier sorting and re-use. The EPSI Flex-Tite™ CPP also features pull tabs for fast and easy application and removal

GWPP SERIES - WELD NUT PULL PLUGS

600°F (315°C)

HELPFUL HINTS

- Durable: High tensile silicone takes repeated uses at high temperatures
- Innovative: Designed for easy pull through removal
- Self-Sealing: Conforms to irregular surfaces on countersinks and lead-in threads

PRODUCT DESCRIPTION

We heard you say that plugs made with commercial silicone sometimes break when plating, anodizing, and e-coating at higher temps. So we created the new EPSI Dura-Tite™ Weld-Nut Pull Plug (GWPP), made with gum silicone for increased tensile strength durability and longer life

Hardness (Shore)	Tensile strength (MPa)	Elongation at break (%)	Breaking set (%)	Tearing strength (KN/M)B

MSPP SERIES - MULTI STEP PULL PLUGS

600°F (315°C)

PRODUCT DESCRIPTION

The Multi Step Pull Plugs (MPP) were created to embody several of the most popular pull plug diameters in one masking plug

HELPFUL HINTS

- **Convenient:** A single MSPP replaces three of the most popular pull plug sizes. This reduces inventory and require less logistics because of its versatility
- **Durable:** Made of durable, high temperature resistant silicone for repeated use
- **Versatile:** Next larger diameter on the same plug can be used to achieve a tighter fit

EMT & SMT SERIES - MOUSETAIL PLUGS

475°F (245°C)/600°F (315°C)

HELPFUL HINTS

- Can be Stretched to Provide a Leak-Proof Seal
- Ideal for Plugging Small or Hard to Reach Holes
- Great Resistance to Chemicals and Hydrocarbons (EMT)

PRODUCT DESCRIPTION

Our Silicone Mousetail (SMT) line is the ideal solution when masking small openings, threaded holes and small irregularly contoured features. Their thin profiles make them extremely stretchy, allowing them to contract and fit into different size holes. Our high temperature silicone SMT is specially formulated to ensure reusability and reliability during masking. Our high temperature EPDM Mousetail (EMT) is specially formulated to resist chemical attack and ensure reusability and economy during masking

TYPICAL APPLICATIONS

Mousetail plugs are typically used as a plug for extremely small holes, especially in electronic components

BES SERIES - BLACK EPDM STOPPERS

475°F (245°C)

PRODUCT DESCRIPTION

Our Black EPDM Stopper (BES) product line is an economical substitute for our STS product line for general plugging applications. With many sizes available, holes from 0.020" to 4.710" in diameter can easily be plugged. Our high temperature EPDM is specially formulated to resist chemical attack and ensure reusability and economy during masking

HELPFUL HINTS

- To find best fit, match hole diameter to plug midpoint diameter
- Black EPDM Stoppers are not recommended for prolonged exposure to intense heat
- Tapered to Fit a Variety of Hole Diameters
- Compressible for Better Sealing of Both Threaded and Non-threaded Holes
- Ideal for Sand Blasting
- Excellent Chemical and Hydrocarbon Resistance

TYPICAL APPLICATIONS

Used as a plug in both threaded and non-threaded holes and in combination with hardware to seal off large cavities

STS SERIES - SILICONE TAPERED STOPPERS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Silicone Tapered Stopper (STS) product line is an industry standard for general plugging applications. With many sizes available, holes from 0.020" to 4.710" in diameter can easily be plugged. Our high temperature silicone is specially formulated to ensure reusability and reliability during masking

TYPICAL APPLICATIONS

Used as a plug in both threaded and non-threaded holes and in combination with hardware to seal off large cavities

HELPFUL HINTS

- To find best fit, match hole diameter to plug midpoint diameter
- When masking off both the front and back of a cavity, it is possible to combine two (STS) with hardware to create a liquid tight mask that resists blow-out
- Silicone Tapered Stoppers are not recommended for exposure to aggressive chemicals or hydrocarbons
- Tapered Design to Fit a Variety of Hole Diameters
- Compressible for Better Sealing of Both Threaded and Non-Threaded Holes

STSH SERIES - SILICONE TAPERED STOPPERS WITH HANDLE

HELPFUL HINTS

- To find best fit, match hole diameter to plug midpoint diameter
- When masking off both the front and back of a cavity, it is possible to combine two (STS) with hardware to create a liquid tight mask that resists blow-out
- Silicone Tapered Stoppers with Handles are not recommended for exposure to aggressive chemicals or hydrocarbons
- Tapered Design to Fit a Variety of Hole Diameters
- Compressible for Better Sealing of Both Threaded and Non-Threaded Holes

PRODUCT DESCRIPTION

Our Silicone Tapered Stopper with Handles (STSH) product line is an industry standard for general plugging applications. With many sizes available, holes from 0.020" to 4.710" in diameter can easily be plugged. Our high temperature silicone is specially formulated to ensure reusability and reliability during masking. Use as an alternative to our Silicone Tapered Stoppers (STS) product line.

TYPICAL APPLICATIONS

Used as a plug in both threaded and non-threaded holes and in combination with hardware to seal off large cavities

HSTS SERIES - HOLLOW SILICONE TAPERED STOPPERS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Hollow Silicone Tapered Stoppers (HSTS) are typically substituted for the same size solid tapered stopper due to their lower cost. With many sizes available, holes from 0.935" to 4.710" in diameter can easily be plugged. Our high temperature silicone is specially formulated to ensure reusability and reliability during masking. Hollow design reduces material and shipping cost

SMS SERIES - SILICONE MASKING STOPPERS

600°F (315°C)

PRODUCT DESCRIPTION

Our Silicone Masking Stoppers (SMS) secure masking affected by pressure build-up. Eliminates “pop-out” and rejected parts. Allows a “mix & match” of sizes for specific needs. Easily combines with custom-designed parts for one or both ends. Provides multiple combinations for solutions on the fly

TYPICAL APPLICATIONS

Used as a plug in bores, shafts, tubes or threaded holes

HELPFUL HINTS

- Select stopper whose midpoint diameter is closest to the diameter of the hole you are plugging

CRKR SERIES - CORK STOPPERS

PRODUCT DESCRIPTION

Our Cork Stopper (CRKR) product line is an economical solution for wet spray applications and low temp powder coating or where it is necessary to leave the plug in for shipping. With many sizes available, holes from 0.120" to 2.125" in diameter can easily be plugged

TYPICAL APPLICATIONS

Tapered to Fit a Variety of Hole Diameters. Economical Cork Material is Ideal for Wet Paint and Shipping Applications

HELPFUL HINTS

- Cork Stoppers can be easily trimmed for shallow cavities
- Select stopper whose midpoint diameter is closest to the diameter of the hole you are plugging

BTM & C-BTM SERIES - THREAD MASK PLUGS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

Our Blind-Hole Threaded Mask (BTM & C-BTM) product line is the answer to the common problem of masking off blind threaded holes. The BTM & C-BTM product line has several features engineered into their design to ensure complete sealing of threads. The C-BTM product line was designed to meet specific OEM requirements and has several features engineered into the design to ensure complete sealing of threads

HELPFUL HINTS

- Shallow Design is Ideal for Blind Hole Applications and Female Threads
- Flange Geometry is Specially Engineered to Mask off Lead-In Chamfers of Threads
- Make Sure Diameter of Mask is at Least 5% Greater than Hole Size
- Removes Cleanly After Use with No Shrinkage

DFP SERIES - DUAL FLANGED PUSH PLUG

600°F (315°C)

HELPFUL HINTS

- **Fast and Easy:** Ergo-designed handle allows for quick installation and removal
- **Convenient:** Designed to fit the most common metric and English weld nut sizes
- **Durable:** Made with NE-G high-grade, high-temp silicone to stand up to abuse and repeated use

PRODUCT DESCRIPTION

Weld-Tite™(DFP) is engineered to allow for repeated use. These dual flanged push plugs are the perfect alternative to traditional dual washer pull plugs in applications where access to the weld nut is limited. Designed to fit the most common metric and english weld nut sizes. These durable pull plugs effectively mask off the chamfer and threads

TPP SERIES - TRIPLE PUSH PLUGS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

PRODUCT DESCRIPTION

One TPP will mask three threaded holes, provide improved chamfered lead coverage and be easier to apply uniformly than the FLPS. Furthermore, since one TPP masks three threaded hole sizes, using it translates into savings as you only have to purchase one plug instead of three. Alternative solution to FLPS and BTM.

HELPFUL HINTS

- When inseting TPPs, simply push and twist in threaded hole

FLPE SERIES - EPDM FLANGELESS PLUGS

FLPS SERIES - SILICONE FLANGELESS PLUGS

475°F (245°C)

FLPE SERIES

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

FLPS SERIES

PRODUCT DESCRIPTION

EPSI's Flangeless Plug (FLPS or FLPE) product line is specifically designed to mask threaded holes, including the top thread, without masking the surrounding area. The tapered ribs and hollow core allow for many different size holes to be masked, regardless of the thread pitch. Imitation plugs have rounded ribs that do not offer the same degree of protection as EPSI's FLPS line. Made of a rugged blend of our High Temperature Silicone, the FLPS has excellent sealing characteristics and reusability.

TYPICAL APPLICATIONS

Used as a plug for threaded holes, including the top thread

HELPFUL HINTS

- Silicone Flangeless Plugs are designed to be inserted via direct pressure. EPSI does not recommend threading these plugs into place, as threading may cause damage to the plug and difficulty during removal.
- Due to the low tear resistance of Silicone, do not use tools (such as pliers) to remove plugs.
- Tapered ribs and hollow core allow for masking of multiple sizes of holes.
- Sharp rib profile offers excellent chamfer coverage.
- Specially formulated to be rigid, allowing plug to be pushed into place.

LTP SERIES - LIQUI-TITE PLUGS

600°F (315°C)

HELPFUL HINTS

- Innovative: The best way to seal threaded holes
- Self Sealing: spiral threads lock out liquids
- Fast and Easy: just push and twist
- Versatile: Coarse and fine threads on one piece
- Durable: High-durometer silicone takes repeated uses at high temps
- Perfect Fit: Designed by our experienced engineering team

PRODUCT DESCRIPTION

The EPSI Guarantee means we listen when you tell us about the masking you do. We heard you say that regular silicone plugs do not seal out liquids well enough for plating, anodizing and e-coating. So we created the new EPSI Liqui-Tite™ Plug with spiral threads, perfectly matched to the holes you are masking. We designed a full range of the most common sizes, with coarse and fine threads on each piece for maximum versatility. Just press the plug straight into a threaded hole, give it a half-twist to seat it, and you're ready to paint, plate, or powder coat with confidence

SOMS SERIES - SINK-O-MASK PLUGS

600°F (315°C)

HELPFUL HINTS

- When plugging a hole, make sure the plug diameter is larger than the diameter of the hole being plugged by at least 5%
- Sink-O-Mask™ Plugs feature pull tabs for easy removal after coating

PRODUCT DESCRIPTION

The Sink-O-Mask™ (SOM™) should be used where it is necessary to protect both a through hole and its surrounding washer area. The tapered design of the flange resists lifting at the edges for a clean finish

TIPS SERIES - TUBE INSERT PLUGS

TYPICAL APPLICATIONS

Plugging of tube and pipe ends

HELPFUL HINTS

- When plugging a hole, make sure that the major diameter of the plug is at least 10% larger than the diameter of the hole being plugged
- Flat washer will cover only the tube end
- U-Channel washer can extend over tube end
- Well suited for liquid tight seal, and resistance to blow-out

PRODUCT DESCRIPTION

Our Tube Insert Plugs (TIPS) are an inexpensive alternative to stoppers. Especially well suited as a liquid tight seal when a large plug diameter is compressed into a small hole. The design of the TIPS resists blow-out when compared to a tapered stopper

TNM SERIES - THREAD-N-MASK PLUG

185°F (85°C)

HELPFUL HINTS

- Insert the lead-in smaller diameter squarely into the threaded hole. Begin twisting the TNM plug. The TNM will begin to take on the shape of the threads, forming a leak-proof seal
- It is recommended that at least 1/4 of the plug be threaded into the hole

PRODUCT DESCRIPTION

The Thread-N-Mask (TNM) plugs are self-tapping. Made from a pliable LDPE plastic, these plugs offer excellent chemical resistance. They are inexpensive enough to be used only one-time

TYPICAL APPLICATIONS

Plugging threaded holes in plating and anodizing applications

TECHNICAL DIAGRAM KEY

ETNM SERIES - ERGONOMIC THREAD-N-MASK PLUGS

NEW!

149°F (65°C)

HELPFUL HINTS

- Insert the lead-in smaller diameter squarely into the threaded hole. Begin twisting the ETNM plug. The ETNM will begin to take on the shape of the threads, forming a leak-proof seal
- It is recommended that at least 1/4 of the plug be threaded into the hole

PRODUCT DESCRIPTION

The ETNM's are self tapping. Made from HDPE plastic, these plugs offer the excellent chemical resistance our TNM are known for, but with an ergonomically designed handle. The HDPE material also makes application much easier. The design also incorporates a through hole, where hanging light parts may be needed

TOPS SERIES - SHALLOW TUBE PLUGS

600°F (315°C)

AVAILABLE IN CUSTOM COLORS

HELPFUL HINTS

- When plugging a hole, make sure that the major diameter of the plug is at least 10% larger than the diameter of the hole being plugged
- Mask both ends of shallow machined bores with two plugs
- Off-Set Handle for Easy Removal

PRODUCT DESCRIPTION

The TOPS hollow body compresses against the inside walls of a bore to create a liquid/air tight seal. TOPS are especially effective when a large diameter, yet shallow through hole must be plugged on both sides. Traditional stoppers can "bottom-out" against each other before a correct seal is accomplished

TYPICAL APPLICATIONS

Masking chamfered and machined bores, creating liquid tight seal for E-coat and plating applications, plugging off large diameter shallow bores

TECHNICAL DIAGRAM KEY

WP SERIES - WASHER PLUGS

600°F (315°C)

HELPFUL HINTS

- When plugging a hole, make sure the major diameter of the plug is 2-4% larger than the diameter of the hole
- Twisting the plug as it is inserted will aid in installation
- Silicone plugs are not recommended for exposure to aggressive chemicals or hydrocarbons
- Tapered design for easy insertion
- Washer masks grounding area around holes
- One plug can be used to plug two different hole Diameters
- Second plug acts as a handle

PRODUCT DESCRIPTION

Our Washer Plug (WP) sizes are conveniently grouped first by washer diameter and then by the larger plug diameter. Many other combinations are possible. If you don't see the size you need listed, call an EPSI representative for other options.

TYPICAL APPLICATIONS

Plugging threaded and non-threaded blind holes with grounding area.

TPSP SERIES - PORT-TITE PLUGS

185°F (85°C)

HELPFUL HINTS

- Innovative: Effectively masks threads as well as protects during shipping/handling
- Self-Sealing: Integrated flange and NBR O-ring provide liquid and air tight seal
- Fast and Easy: Install/remove by hand, socket, wrench, or #2 phillips head screwdriver
- Durable: High-density polyethylene stands up to repeated use
- Ideal Solution: Flange and O-ring make Port-Tite perfect for plating applications

PRODUCT DESCRIPTION

EPSI's Port-Tite (TPSP) threaded port sealing plugs are designed to fit the most common standard and metric ports. The integrated flange and NBR O-ring not only provide a liquid and air tight seal, they also protect the port from damage and contamination during shipping and handling. Our polyethylene plugs are rugged, durable, and the perfect solution for plating applications. Plus, Port-Tite's raised hex head and socket allow for application and removal by hand, socket, wrench, or a #2 Phillips screwdriver

HTP SERIES - HANGING THREADED PLUGS

600°F (315°C)

HELPFUL HINTS

- **Durable:** Cold rolled steel insert and high temp commercial grade silicone to withstand repeated use. It can be made custom upon request.
- **Versatile:** Provides a liqui-tite seal in immersion processes, while allowing conductivity to your part.
- **Convenient:** Hangs heavier threaded parts* and seals off the first thread, or chamfer of the hole at the same time.

PRODUCT DESCRIPTION

The Hang-Tite Plug (HTP) serves the function of a plug and a hanging tab. It is especially favorable for powder coating, but optimal for all immersion processes. The metal core allows conductivity for powder coating.

TCP SERIES - TAPERED CAP & PLUG

185°F (85°C)

HELPFUL HINTS

- Versatile: Effectively masks as a cap or plug in a wide variety of applications
- Protective: Keeps parts free from contaminants and during debris during handling and storage
- Fast and Easy: Quick to install and remove by hand
- Economical: Inexpensive enough for one-time use, yet durable enough for repeated use

PRODUCT DESCRIPTION

EPSI's Tapered Cap & Plug (TCP) serves as an economical dual function closure which can be used as either a cap or as a plug. These tapered polyethylene masks provide a secure fit, yet are easy to install and remove

Tapered Cap & Plug (TCP) functions effectively as a cap for tube and hydraulic fittings, tube ends, pipes and for protection from contaminants and debris. It also serves well as a plug for threaded holes, openings, fittings and ports

Tapered Cap & Plug (TCP) functions well both for masking during the coating process and for protection during material handling

EPSI has a masking tape for every application and every temperature. All of our tapes are converted in-house, assuring that you get exactly what you need. Consider a roll of polyester or polyimide tape for masking off large surfaces, one of EPSI's patented wishbone discs for smaller areas with easy removal or a doughnut disc which can be used in conjunction with other masking to protect washers or add extra coverage.

EPSI makes masking easy!

CUSTOMS

The EPSI Guarantee means that we provide you with the best solutions for your masking needs. Sometimes that solution is one of our guaranteed products, but other times you need a custom solution. Our in-house engineering teams has decades of experience in working with customers to produce a solution fit to your precise needs. We continue to lead the industry in creating efficient, custom solutions for diverse applications.

We are the masking experts and we have calculated the point where customers will realize savings using a custom mold or custom tape mask verses masking with standard products.

Your EPSI sales representative can help you estimate your savings and determine whether a custom product is the right solution for you.

That's the EPSI guarantee!

A12 TAPE SERIES - GREEN POLY TAPE

400°F (204°C)

HOT

- Maximum Temperature: 400°F
- Total Thickness: 3.5 mils
- Hi-Temperature Silicone adhesive system
- Removes cleanly after use
- No shrinkage

PRODUCT DESCRIPTION

A12 is a polyester film, single coated with a silicone pressure sensitive adhesive

TYPICAL APPLICATIONS

Masking in Powder Coating, E-Coating, Anodizing and Some Plating Applications

CONSTRUCTION

Total Thickness	3.5 mils
Adhesive Thickness	1.5 mils
Carrier Thickness	2.0 mils
Adhesive Type	Silicone
Carrier Type	Polyester
Color	Green

HELPFUL HINTS

Maximum Temperature (F)	400°
Tensile Strength (lbs/inch)	50
Elongation (%)	110
Peel Adhesion (oz/inch)	35

Our A12 green polyester tape is the industry standard for general purpose powder coating applications. It is extremely economical and removes cleanly from surfaces without leaving a residue. A12 is ideal for applications such as taping off large surfaces, general purpose die cutting and large volume runs

Current pricing, case quantities and additional sizes available at www.epsi.com

400°F intermittent rating. Contact an EPSI representative for recommendations on tapes for continuous or extended use. Many factors can affect the use and performance of a product in a particular application. This product should be tested to determine the suitability for its intended use.

AW12 TAPE SERIES - GREEN WISHBONE DISCS

400°F (204°C)

HOT

- Maximum Temperature: 400°F
- Total Thickness (mils): 3.5 mils
- Designed for easy removal from roll
- Removal tab in center eliminates shadow effect found in other designs
- Easy-to-find tab; even under thickest coatings
- Hi-Temperature silicone adhesive system
- Removes cleanly after use
- No shrinkage

PRODUCT DESCRIPTION

AW12 is a polyester film, single coated with a silicone pressure sensitive adhesive. Tape is laminated with a center tab, and discs are rotary die-cut on a specially formulated fluorosilicone liner

TYPICAL APPLICATIONS

Masking in Powder Coating, and Wet Spray. Also can be used for E-Coating, Anodizing and Plating applications (See Note Below)

CONSTRUCTION

Total Thickness	3.5 mils
Adhesive Thickness	1.5 mils
Carrier Thickness	2.0 mils
Adhesive Type	Silicone
Carrier Type	Polyester
Color	Green

SPECIFICATIONS

Maximum Temperature (F)	400°
Tensile Strength (lbs/inch)	50
Elongation (%)	110
Peel Adhesion (oz/inch)	35

Our U.S. and Internationally Patented AW12 green polyester wishbone discs are rapidly becoming the discs of choice for general purpose powder coating applications. Easy grip tab aids in proper disc placement. Eliminate the "hunt" for buried discs that cause rework; the easy-to-find tab makes locating and removing the disc quick and free from surface marring. AW12 discs are cut with high-precision rotary tooling

400°F intermittent rating. Contact an EPSI representative for recommendations on tapes for continuous or extended use. Many factors can affect the use and performance of a product in a particular application. This product should be tested to determine the suitability for its intended use.

B12 TAPE SERIES - BLUE POLY TAPE

350°F (175°C)

- Extremely conformable
- Good chemical resistance
- Prevents leakage
- Removes cleanly after use

CONSTRUCTION

Total Thickness	3.0 mils
Adhesive Thickness	2.0 mils
Carrier Thickness	1.0 mils
Adhesive Type	Silicone
Carrier Type	Polyester
Color	Light Blue

PRODUCT DESCRIPTION

Our B12 blue polyester tape is ideal for general powder coating applications; it is the industry standard for conformable polyesters. B12 removes cleanly from surfaces without leaving a residue and is well-suited for applications such as taping off large surfaces, general purpose die cutting, PC board masking, and sharp edge masking

TYPICAL APPLICATIONS

Powder Coating, E-Coating, Circuit Board Insulation and Hot Air Leveling

SPECIFICATIONS

Maximum Temperature (F)	350°

D12 TAPE SERIES - RED POLY TAPE

- Extremely conformable
- Good chemical resistance
- Preshrunk film
- Removes cleanly after use

PRODUCT DESCRIPTION

Our D12 red polyester tape is the industry standard for immersion coating applications. Its thin carrier thickness and high adhesion properties make it an ideal candidate where plating, anodizing and E-Coating is used, or where a moisture proof seal is required

CONSTRUCTION

Total Thickness	3.7 mils
Adhesive Thickness	2.7 mils
Carrier Thickness	1.0 mils
Adhesive Type	Silicone
Carrier Type	Polyester
Color	Red

012 TAPE SERIES - ULTRA ORANGE POLY TAPE

430°F (220°C)

- Maximum Temperature: 430°F
- Total Thickness: 3.5 mils
- Hi-Temperature silicone adhesive system
- Removes cleanly after use
- No shrinkage
- More flexible than green poly tape (A12)

PRODUCT DESCRIPTION

012 is a polyester film, single coated with a silicone pressure sensitive adhesive

TYPICAL APPLICATIONS

Masking in Powder Coating, E-Coating, Anodizing and Some Plating Applications, Electrical

CONSTRUCTION

Total Thickness	3.5 mils
Adhesive Thickness	1.5 mils
Carrier Thickness	2.0 mils
Adhesive Type	Silicone
Carrier Type	Polyester
Color	Orange

R12 TAPE SERIES - RUSTY POLY TAPE

430°F (220°C)

PRODUCT DESCRIPTION

Our R12 rusty polyester tape is ideal for high temp powder coating and e-coating applications. It is an economical choice for applications requiring temperature resistance greater than general purpose green polyester tape, but less than the high temp polyimide tapes

SPECIFICATIONS

Maximum Temperature (F)	430°
Tensile Strength (lbs/inch)	50
Elongation (%)	100
Peel Adhesion (oz/inch)	35

- Maximum Temperature: 430° F
- Removes cleanly after use with no shrinkage

CONSTRUCTION

Total Thickness	3.4 mils
Adhesive Thickness	1.4 mils
Carrier Thickness	2.0 mils
Adhesive Type	Silicone
Carrier Type	Polyester
Color	Rusty

K12/K22 TAPE SERIES - 1 MIL & 2 MIL POLYIMIDE TAPE

500°F (260°C)/600°F (315°C)

- Maximum Temperature: 500°F (K12) & 600°F (K22)
- K12 is thin and conformable, enabling masking of uneven surfaces
- K22's high-strength backing provides superior puncture, tear and abrasion resistance
- Removes cleanly without adhesive residue after exposure to heat and/or chemicals
- Chemically resistant
- Flame-retardant and excellent electrical insulation

PRODUCT DESCRIPTION

Our K12 polyimide film tape combines a 1.6 mil high temperature pressure sensitive adhesive with a 1.0 mil flexible carrier to create a tape product which is perfect for high temperature masking needs. Typical applications include the protection of printed circuit board gold finger contact leads during wave soldering

Our K22 polyimide film tape combines a 1.5 mil high temperature pressure sensitive adhesive with a 2.0 mil flexible carrier to create a tape product which is perfect for high temperature masking needs. Typical applications include the electrical insulation of high temperature coils, motors and transformers

TYPICAL APPLICATIONS

Powder Coating, E-Coating, Wave Soldering, Circuit Board Insulation and Hot Air Leveling. The product is UL approved for use in the electrical insulation applications meeting Class H requirements

CONSTRUCTION K12 K22

KD22 TAPE SERIES - 2 MIL POLYIMIDE DISCS

600°F (315°C)

- Maximum Temperature: 600°F
- Total Thickness: 3.5 mils
- High-strength backing provides superior puncture, tear and abrasion resistance
- Removes cleanly after use
- Chemically resistant
- Flame-retardant
- Excellent electrical insulation

PRODUCT DESCRIPTION

KD22 is a 2.0 mil thick polyimide film, single coated with a high-performance silicone pressure sensitive adhesive. Tape is laminated and discs are rotary die-cut on a specially formulated fluorosilicone liner.

TYPICAL APPLICATIONS

Powder Coating, E-Coating, Wave Soldering, Circuit Board Insulation. Electrical insulation of various high temperature coils, motors and transformers meeting class H requirements.

CONSTRUCTION

Total Thickness	3.5 mils
Adhesive Thickness	1.5 mils
Carrier Thickness	2.0 mils
Adhesive Type	Silicone
Carrier Type	Polyimide
Color	Amber

SPECIFICATIONS

Maximum Temperature (F)	600°
Tensile Strength (lbs/inch)	55
Elongation (%)	60
Peel Adhesion (oz/inch)	22
Dielectric Strength (volts)	12000

Our KD22 polyimide discs combine 1.5 mils of high temperature pressure sensitive silicone adhesive with a 2.0 mil flexible carrier to create a tape product perfect for high temperature masking needs. Typical applications include the electrical insulation of high temperature coils, motors and transformers meeting Class H requirements.

600°F intermittent rating. Contact an EPSI representative for recommendations on tapes for continuous or extended use. Many factors can affect the use and performance of a product in a particular application. This product should be tested to determine the suitability for its intended use.

F12 TAPE SERIES - FIBERGLASS [GLASS CLOTH] TAPE

FD12 TAPE SERIES - FIBERGLASS [GLASS CLOTH] DOTS

500°F (260°C)

- Maximum Temperature: 500°F
- Total Thickness: 7.0 mils
- Maximum resistance to flagging and varnish solvents
- High tensile strength
- Non-corrosive
- Extremely high abrasive resistance frey-free edges

PRODUCT DESCRIPTION

F12 is a fiberglass reinforced cloth substrate with a proprietary Therm-X silicone adhesive system

TYPICAL APPLICATIONS

Powder Coating, Plasma Spray, Thermal Spray, Grit and Shot Blasting

CONSTRUCTION

Total Thickness	7.0 mils
Adhesive Thickness	2.0 mils
Carrier Thickness	5.0 mils
Adhesive Type	Silicone
Carrier Type	Glass Cloth
Color	White

SPECIFICATIONS

Maximum Temperature (F)	500°
Tensile Strength (lbs/inch)	170
Elongation (%)	8
Peel Adhesion (oz/inch)	40
Dielectric Strength (volts)	3000
Insulation Resistance (meg ohms)	1500

Our F12 fiberglass tape combines a 2.0 mil Silicone adhesive with 5.0 mil glass cloth carrier to create a tape product which is ideal for shot blasting, grit blasting, thermal spray and plasma spray applications. Typically fiberglass tape is used to protect machined surfaces during shot blasting applications. F12 is an excellent choice in thermal spray and plasma spray applications due to its excellent resistance to intense heat. Not recommended for applications involving immersion coating due to the porous nature of the glass cloth backing

500°F intermittent rating. Contact an EPSI representative for recommendations on tapes for continuous or extended use. Many factors can affect the use and performance of a product in a particular application. This product should be tested to determine the suitability for its intended use.

C10 TAPE SERIES - CREPE MASKING TAPE **3M™ 2364 Tape**

300°F (150°C)

- Maximum Temperature: 300°F
- Total Thickness: 6.5 mils (w/o liner)
- Good conformability and curve masking
- Solvent resistant
- Prevents bleed-through
- Sliver resistant
- Good paint flaking resistance
- Helps minimize rework

PRODUCT DESCRIPTION

C10 (2364) is a tan colored crepe paper masking tape with a natural synthetic rubber blend adhesive

TYPICAL APPLICATIONS

General masking applications in the industrial market including low temperature powder coating and liquid spray applications

CONSTRUCTION

Total Thickness	6.5 mils
Adhesive Type	Natural/synthetic rubber blend
Carrier Type	A smooth crepe paper treated with a heat resistant saturant
Color	Tan

SPECIFICATIONS

Temperature Range (°F)	300° (for 30 min)
Tensile Strength (lbs/inch)	30
Elongation (%)	10
Peel Adhesion (oz/inch)	36

Note: Should not be subjected to outdoor exposure or prolonged sunlight. Tape may become difficult to remove
C10 (2364) general purpose crepe tape is ideal for applications where good holding power and temperature performance are required. It can be used in low temperature powder coating, as well as in wet spray applications. Due to its economical price point, C10 (2364) is an excellent solution for large, flat surfaces that require masking during wet spray

C12 TAPE SERIES - CREPE MASKING TAPE **3M™ 2380 Tape**

325°F (165°C)

- Maximum Temperature: 325°F
- Total Thickness: 7.5 mils
- Instant adhesion
- Good holding power
- Superior adhesive transfer resistance
- Smooth; dead stretch
- Conformable

AUTHORIZED 3M CONVERTER

PRODUCT DESCRIPTION

C12 (2380) is a tan colored smooth crepe paper treated with a heat and solvent resistant saturant and a natural synthetic rubber blend adhesive

TYPICAL APPLICATIONS

A smooth, strong, mini-crepe paper masking tape suitable for most paint masking applications. Designed for industrial use where a good paint line is desired and drying conditions range from air dry to an oven bake

CONSTRUCTION

Total Thickness	7.5 mils (w/o liner)
Adhesive Type	Natural/synthetic rubber blend
Carrier Type	A smooth crepe paper treated with a heat and solvent resistant saturant
Color	Tan

SPECIFICATIONS

Temperature Range (°F)	325° (for one hour)
Tensile Strength (lbs/inch)	27
Elongation (%)	10
Peel Adhesion (oz/inch)	43

Note: Should not be subjected to outdoor exposure or prolonged sunlight. Tape may become difficult to remove

C21 TAPE SERIES - HI-TEMP CREPE MASKING TAPE

[PG-21™]

325°F (165°C)

- Straight, clean paint-break line
- Highly conformable and flexible
- Tear resistant; solvent resistant
- Resists paint flaking upon removal

PRODUCT DESCRIPTION

Our C21 is the industry standard in high performance crepe tape for low temp powder coating and liquid top coat. It is designed for clean removal from a variety of surfaces after exposure to oven temperatures up to 325 °F. C21 performs well in wet spray applications. Its easy handling smooth crepe backing exhibits high strength, excellent conformability to irregular surfaces and exceptional cornering characteristics

CONSTRUCTION

Total Thickness 7.3 mils
 Adhesive Type Rubber/ Resin Adhesive
 Carrier Type Fine Structured Crepe Paper

- Resists paint flaking upon removal

PRODUCT DESCRIPTION

CD21 (PG-21) is a tan colored crepe paper masking tape with a rubber resin blended adhesive. Tape is laminated and discs are rotary die-cut on a specially formulated paper release liner

TYPICAL APPLICATIONS

General masking applications in the industrial market including low temperature Powder Coating and Liquid Spray applications

CONSTRUCTION

Total Thickness	7.3 mils
Adhesive Type	Rubber/ Resin Adhesive
Carrier Type	Fine Structured Crepe Paper
Color	Tan; Kraft

SPECIFICATIONS

Maximum Temperature (F)	325°
Tensile Strength (lbs/inch)	26
Elongation (%)	10
Peel Adhesion (oz/inch)	28

Our CD21 (PG-21) is the industry standard in high performance crepe discs. They are high temperature pressure-sensitive masking discs designed for clean removal from a variety of surfaces after exposure to oven temperatures up to 325°F. CD21 (PG-21) discs perform well in wet strip applications

325°F intermittent rating. Contact an EPSI representative for recommendations on tapes for continuous or extended use. Many factors can affect the use and performance of a product in a particular application. This product should be tested to determine the suitability for its intended use.

SPVC TAPE SERIES - SANDBLASTING TAPE

176°F (80°C)

- Superior quality with a long shelf-life
- Very effective moisture and vapor barrier
- Highly conformable
- Resists aging, sun, water, fungus, bacteria, oils, acids, alkalies, and corrosive chemicals
- Good abrasion, impact, and rupture resistance

PRODUCT DESCRIPTION

Our SPVC Pipe Wrap/Surface Protection Tape is highly resistant to sun, water, oil, acids, alkalies and corrosive chemicals, bacteria and fungus resistant, abrasion resistant, provides electrical protection and protects pipe joints, conduit couplings for overhead or direct buried applications

PRODUCT SPECIFICATIONS

- Thickness: 20mil (0.50mm)
- Black matte finish
- Rubber Adhesive
- Adhesion/steel: 11 oz/in
- Tensile Strength: 32 lb/in
- Elongation: 360%
- Temperature Resistance: 176° F (80 °C)

S10/S20/S30 TAPE SERIES - SILICONE SELF-FUSING TAPE

600°F (315°C)

- Maximum Temperature: 600 °F
- Excellent insulation value up to 12,000 volts
- No adhesive; only sticks to itself

- Waterproof
- Form fitting

PRODUCT DESCRIPTION

Our high temperature silicone self-fusing tape line has no adhesive, leaves no residue and fuses to itself in 24 hours to form a permanent watertight seal. It is ideal for high temperature applications such as electrical insulation, splicing and cable harnesses

TYPICAL APPLICATION

Powder Coating, E-Coating, Plating, Anodizing and Harness Wrapping. Additional uses include Automotive Repair, Lead Termination, Home Repairs, Marine Applications and as a Grip Tape

SPECIFICATIONS

Temperature Range (F)	Continuous: -65 to 500 °F Intermittent: -85 to 600 °F
Tensile Strength (PSI)	700 PSI Minimum (ASTM D-412)
Elongation (%)	300
Tear Resistance (PSI)	85
Durometer (Shore A)	50 (Room Cured)
Dielectric Strength (VPM)	200 - 400
Dielectric Constant (1 KHz)	2.95
Dissipation Factor (1KHz)	<.0004
Insulation Resistance (ohms/cm)	3 X 10 ¹⁴
Moisture Absorption	3% Max. by weight
Government Specifications	Meets or Exceeds A-A-59163 (Supersedes mils I-46852C)

M10 TAPE SERIES - ALUMINUM TAPE

325°F (165°C)

- Maximum Temperature: 325°F
- High reflectivity assures effective heat, light interference
- Malleable foil conforms well to irregular surfaces
- Effective as electrical isolation shielding

PRODUCT DESCRIPTION

3.0 mil high strength self-wound dead soft aluminum foil coated with an aggressive acrylic adhesive system to create a superior bond

TYPICAL APPLICATIONS

Waterproofing, vapor barrier, air leakage protection, metal patching and sound dampening. As a sealing system in refrigerated applications and microwave ovens. Electrical isolation shielding. Masking in paint stripping and electroplating

CONSTRUCTION

Total Thickness	5.0 mils
Adhesive Thickness	2.0 mils
Carrier Thickness	3.0 mils
Adhesive Type	Acrylic
Carrier Type	Soft Aluminum Foil
Color	Silver

SPECIFICATIONS

Maximum Temperature (F)	325°
Tensile Strength (lbs/inch)	28
Elongation (%)	5.5
Peel Adhesion (oz/inch)	72
Government Specifications:	Meets Specifications for LT-80-B; MIL-T-23397B, Amendment 2, Type II

P12 TAPE SERIES - LEAD FOIL TAPE

225°F (105°C)

- Maximum Temperature: 225°F
- Good solvent resistance
- Excellent adhesion to a wide variety of surfaces
- Highly malleable

PRODUCT DESCRIPTION

100% pure lead foil with a synthetic rubber adhesive wound with a liner

TYPICAL APPLICATION

Used for stop off masking during electroplating, chemical milling, paint stripping and where a moisture proof seal is required. Also used as an electromagnetic and radio frequency shield

SPECIFICATIONS

Maximum Temperature (F)	225°
Tensile Strength (lbs/inch)	23
Elongation (%)	30
Peel Adhesion (oz/inch)	96
Government Specifications	HH-T-29A, Amendment 2

CONSTRUCTION

Total Thickness	6.5 mils
Adhesive Thickness	1.5 mils
Carrier Thickness	5.0 mils
Adhesive Type	Blended Rubber
Carrier Type	Lead Foil
Color	Silver

Note: Wear protective gloves and/or wash hands after working with tape. Lead will slowly leach into water when submerged. Leaching will accelerate as acidity increases. This material when disposed of separately is classified as RCRA hazardous waste. Please consult applicable Federal, State and Local regulations for proper disposal

P14 TAPE SERIES - LEAD FOIL TAPE

225°F (110°C)

- Electrically conductive
- Malleable and conforms to surfaces
- Good chemical resistance
- Minimizes undercutting for straighter lines

PRODUCT DESCRIPTION

P14 (421) has a 5 mil nominal lead foil backing with a rubber adhesive, which is well suited as a masking in electroplating and as a moisture and radiation barrier in certain applications. Additional applications include Radiation Barrier; Moisture Barrier; Chemical Milling; X-Ray Plate Masking

CONSTRUCTION

Total Thickness	6.8 mils (w/o liner)
Adhesive Thickness	2.1 mils
Carrier Thickness	4.7 mils
Adhesive Type	Rubber (green)
Carrier Type	Lead foil

SPECIFICATIONS

Temperature Range (°F)	-60° to 225°
Tensile Strength (lbs/inch)	20
Elongation (%)	12
Peel Adhesion (oz/inch)	45
Moisture Vapor	0.1g H2O/100sq. In./24hrs

Note: Wear protective gloves and/or wash hands after working with tape. Lead will slowly leach into water when submerged. Leaching will accelerate as acidity increases. This material when disposed of separately is classified as RCRA hazardous waste. Please consult applicable Federal, State and Local regulations for proper disposal

V10 TAPE SERIES - GENERAL PURPOSE VINYL TAPE

176°F (80°C)

- Effective vapor and moisture barrier
- Highly conformable
- Resistant to aging, sun, water, fungus, bacteria, oil, acids, alkalis and corrosive chemicals
- Good abrasion, impact and rupture resistance.
- Conforms to PPP-T-66E, Type 1, Class 2; A-A-1689A

PRODUCT DESCRIPTION

Used for color coding, lane marking and safety coding to meet OSHA requirements, decorating, striping on vehicles, boats, and sporting equipment. Masking for Hard Chrome Plating, Electroplating, Type II and Type III Anodizing, Abrasive Blasting, Wet Painting, Fixture Wrapping, Harness and Pipe Wrapping, Duct and Joint Sealing

CONSTRUCTION

Total Thickness	6.0 mils
Adhesive Type	Synthetic Rubber Resin
Carrier Type	Matte surface, soft PVC
Color	Purple

SPECIFICATIONS

Maximum Temperature (F)	176° F
Tensile Strength (lbs/inch)	16
Elongation (%)	150
Peel Adhesion (oz/inch)	22
Moisture Absorption	Less than 1.5%
Moisture Vapor	Less than 2.5% (gm/100 sq in/24hrs)
Metal Corrosion	None to Copper, Brass, Steel or Aluminum
Government Specifications	Conforms to PPP-T-66E, Type 1, Class 2; A-A-1689A

V12 TAPE SERIES - ELECTROPLATING VINYL TAPE

176°F (80°C)

- Maximum temperature: 176 °F
- Total Thickness: 6.5 mils
- Effective vapor and moisture barrier
- Durable and highly resistant to oil, acid, alkaline and corrosive chemicals
- Excellent adhesion to metals and plastics
- Extremely conformable

PRODUCT DESCRIPTION

6.5 mil conformable self-wound soft PVC Vinyl with a rubber adhesive

TYPICAL APPLICATIONS

Used as a masking tape in electroplating operations. Designed for use with PCB terminal zone contacts during plating; as a protection tape for shot peening

Note: DO NOT peel off until temperature cools down to 140 °F to 158F (60 °C to 70 °C)

Our V12 cream vinyl tape is extremely conformable and resistant to aging, sun, water, oils, acids and corrosive chemicals. It has excellent adhesion to metals and plastics, making it the ideal choice in any plating application. The adhesive backing provides excellent solvent and chemical resistance

CONSTRUCTION

Total Thickness	6.5 mils
Adhesive Type	Rubber Based
Carrier Type	Soft PVC (non-rigid vinyl)
Color	Yellow

SPECIFICATIONS

Maximum Temperature (F)	176°
Tensile Strength (lbs/inch)	25
Elongation (%)	200
Peel Adhesion (oz/inch)	30
Moisture Absorption	Less than 1.5%
Moisture Vapor	Less than 2.5% (gm/100 sq in/24hrs)
Government Specifications	Meets Government specifications H-H-T-0025, Amendment 2

PART NUMBER	Length (yds)	Standard Width (in)	Width (in)	Length (m)	Width (mm)	Case Qty
V12-00127	36	1/2 in	0.500	33	12.7	64

V14 TAPE SERIES - VINYL ELECTROPLATING TAPE

170°F (75°C)

3M™
470 Tape

- Maximum temperature: 170 °F
- Excellent resistance to electroplating chemicals
- Abrasive resistant
- Meets federal specification HH-T-0025 (GSA-FSS)

PRODUCT DESCRIPTION

V14 (470) is a 7.1 mil self-wound conformable colored vinyl backing with a rubber adhesive

TYPICAL APPLICATIONS

Masking during many electroplating operations, including both flat strip and overlapping masks. Wrapping, patching, coated racks and masking many irregular surfaces

CONSTRUCTION

Total Thickness	7.1 mils
Adhesive Thickness	0.8 mils
Carrier Thickness	6.3 mils
Adhesive Type	Rubber
Carrier Type	Pigmented vinyl plastic
Color	Tan

SPECIFICATIONS

Temperature Range (°F)	170°
Tensile Strength (lbs/inch)	20
Elongation (%)	180
Peel Adhesion (oz/inch)	26
Government Specifications:	Can be qualified to meet federal Specification HH-T-0025 (GSA-FSS) Amendment 2

Note: While V14 (470) resists most solvents, avoid ketones, chlorinated hydrocarbons and esters found in thinners, degreasers, paint strippers, etc., which may cause the backing to swell or curl. Prolonged exposure to elevated temperatures and hot caustics may cause weakening of the adhesive bond

AUTHORIZED 3M CONVERTER

PART NUMBER	Length (yds)	Standard Width (in)	Width (in)	Length (m)	Width (mm)	Case Qty

V71 TAPE SERIES - NON-ADHESIVE VINYL TAPE

- Extremely conformable matrix; clings to corners
- Clings securely to itself without adhesive
- Durable and highly resistant to oil, acid, alkaline and corrosive chemicals
- High elongation and good strength
- Mask 2 to 3 times faster than with adhesive

PRODUCT DESCRIPTION

Our V71 product is a multi-purpose tape, with excellent chemical resistance and insulation properties. It is the premier choice for plating, Type II and Type III anodizing applications. Overlapping while stretching the film allows for a liquid tight seal around racks and other parts. It can also be used to replace plastisol dipping for racks. The lack of an adhesive makes V71 extremely easy and economical to apply

SPECIFICATIONS

Maximum Temperature (F)	176°
Tensile Strength (lbs/inch)	11.5
Elongation (%)	250
Dielectric Strength (vpm)	1200

We at EPSI understand that hanging and racking is a vital component of your production line. With our multitude of hook styles and diameters, we can help you maximize your line density to increase your production quantity and quality. We provide quality hard drawn steel for our smaller diameter hooks while the larger diameter hooks are made of cold rolled steel. All of our hooks are durable and created to withstand repeated stripping. Whatever your hanging needs, we have a solution for you.

EPSI makes masking easy!

CUSTOMS

The EPSI Guarantee means that we provide you with the best solutions for your masking needs. Sometimes that solution is one of our guaranteed products, but other times you need a custom solution. Our in-house engineering teams has decades of experience in working with customers to produce a solution fit to your precise needs. We continue to lead the industry in creating efficient, custom solutions for diverse applications.

We are the masking experts and we have calculated the point where customers will realize savings using a custom mold or custom tape mask verses masking with standard products.

Your EPSI sales representative can help you estimate your savings and determine whether a custom product is the right solution for you.

That's the EPSI guarantee!

HELPFUL HINTS

- Can be used in combination to daisy chain multiple items together
- Ideal for wider parts or multiple styles of parts with varying thicknesses

Explanation of Hook Product Numbers:

(ie; HC 15045-38)

HOOK LOADING COMPARISON (2X SAFETY FACTOR)

Round Wire			
0.062"	1.575 mm	DIAMETER HD SPRING WIRE	4 LBS
0.076"	1.930 mm	DIAMETER HD SPRING WIRE	7 LBS
0.120"	3.048 mm	DIAMETER HD SPRING WIRE	25 LBS
0.180"	4.572 mm	DIAMETER HD SPRING WIRE	75 LBS
0.250"	6.350 mm	DIAMETER CRS 1008 WIRE	60 LBS

NOTE: The recommended safe load limits were compiled under static load conditions in a laboratory fully accredited by the American Association for Laboratory Accreditation, conforming to ISO Guide 25. Although all load limits incorporate a safety factor, many factors will affect the actual dynamic load capacity of a hook. Such factors include sudden change in line speed, vibration in the conveyor, or in the case of suspension from two hooks, a shift in the center of gravity caused by an incline or stretching along curves in the conveyor. This product should be tested to determine the suitability for its intended use.

HCV SERIES - CV-HOOKS

HELPFUL HINTS

- Hybrid hook configuration
- Combines the features of a V-hook with the ease of use of a C-hook
- Can be used on both traditional and round stock conveyor systems
- Offer the greatest load capacity with the smallest amount of hook marking

Explanation of Hook Product Numbers:

(ie; HCV 15045-32)

CLAW SERIES - CLAW HOOKS

HELPFUL HINTS

- Designed to handle the most unusual of hanging situations
- Their unique clamping action and strong contact points allow even the most unconventional of items to be hung
- Available in three different strengths:
 - Claw 200
Light Duty to 5 lbs
 - Claw 300
Medium Duty to 10 lbs
 - Claw 400
Heavy Duty to 40 lbs

PART NUMBER	Length (in)	Wire Diameter (in)	Length (mm)	Wire Diameter (mm)	Prongs	Box Qty
CLAW 200	2.4	0.08	60	2.0	3	50
CLAW 300	4.8	0.12	120	3.0	3	50
CLAW 400	6.5	0.16	165	4.0	3	50

SWIVEL SERIES - SWIVEL HOOKS

HELPFUL HINTS

- Cold rolled steel construction
- Holds up to 250 lbs
- Ball bearings ensure smooth rotation even under loading
- Feature a V-shaped (Swivel-V) or a radial (Swivel R) hanging point

[R] SERIES

[V] SERIES

PART NUMBER	Load Capacity (lbs)	Load Capacity (kg)	Rotation	Box Qty
SWIVEL (R)	250	110	Infinite	2
SWIVEL (V)	250	110	Infinite	2

Current pricing and additional sizes available at www.epsi.com

HKRO SERIES - SPRING TUBE HOOKS

HELPFUL HINTS

- Easy to Apply
- Allows for hook marks to be hidden inside of holes and other non-cosmetic features
- Flexible enough to fit a variety of otherwise difficult applications
- Available in three different strengths

CAUTION! Please exercise caution when removing Spring Tube Hooks as they will expand quickly and with great force

PART NUMBER	Length (in)	Wire Diameter (in)	Length (mm)	Wire Diameter (mm)	Box Qty
HKRO 100	1.77	0.04	45	1.0	250
HKRO 200	4.13	0.08	105	2.0	250
HKRO 300	4.25	0.12	108	3.0	250

HKSC SERIES - SHEET & PIPE SUSPENDER HOOKS

HELPFUL HINTS

- Made of cold rolled steel
- Reusable
- Suitable for products that lack holes for suspension
- Accepts sheet metal up to 4.0 mm (.160") thick
- Has holes for use with standard hooks for easy hanging

PART NUMBER	Standard Thickness (in)	Metric Thickness (mm)	Box Qty
HKSC 002040	0.08	2.0	50

Current pricing and additional sizes available at www.epsi.com

HS SERIES - S-HOOKS

HELPFUL HINTS

- Can be used in combination to daisy chain multiple items together
- Ideal for wider parts or multiple styles of parts with varying thicknesses

Explanation of Hook Product Numbers:

(ie; HS 15045-38)

ST SERIES - SILICONE TUBING

600°F (315°C)

- Fits over threaded studs, dowels, pins and tubing
- Cuts easily to length
- Conforms to irregular geometries
- Sizes range from 0.040" ID to 2.000" ID

PRODUCT DESCRIPTION

Our Silicone Tubing (ST) product line is ideal for masking off irregular geometries, long protrusions or as a substitute for short runs. The versatile nature of the tubing allows it to fit over extrusions, threaded studs, PEMS and dowels, or as a plug for tapped holes, irregular contours and threaded holes. Our high temperature silicone is specially formulated to ensure reusability and economy during masking

TYPICAL APPLICATIONS

Used as a sleeve over threaded studs, dowels, and protrusions. Used as a flexible mask for round channels and cut outs

HELPFUL HINTS

- When sizing parts as a sleeve, the ID of the ST Tubing should be approximately equal to the stud diameter
- To ensure easy removal, cut the tube length at least 1/2" longer than masking length of the stud. This is especially important if the tube ID is smaller than the stud diameter by more than 2%
- When sizing parts as a plug, the OD should be 3 - 7% larger than the hole diameter
- Due to the low tear resistance of silicone, do not use pliers or other sharp tools for removal
- Can be used in conjunction with a standard cap to create a long, non-hollow cap

ST SERIES (CONTINUED)

FSTS SERIES - FLEXIBLE STAR TUBING

600°F (315°C)

- Fits over threaded studs, dowels, pins and tube stock
- Each size fits multiple diameters
- Low friction for easy placement and removal
- Flexible enough to conform to irregular geometries
- Cuts easily to length
- Sizes range from 0.200" ID to 2.000" ID
- Color coded for easy identification

PRODUCT DESCRIPTION

Our Flexible Star Tubing (FSTS) product line is ideal for masking off irregular geometries, long protrusions or as a fill-in for small runs of parts. Our high temperature silicone is specially formulated to ensure reusability and economy during masking

HELPFUL HINTS

- When sizing product as a sleeve, the Major ID of the FSTS tubing should be approximately equal to the stud or tube diameter you are sliding it over

CRDF SERIES - SILICONE FOAM CORD

600°F (315°C)

- Compresses to seal off slots and through holes
- Cuts easily to length
- Conforms to irregular shaped openings
- Color coded for easy identification

PRODUCT DESCRIPTION

Our Solid Silicone Foam Cord (CRDF) product line is a great solution when looking for a compressible part to fit into a threaded or non-threaded opening. The solid silicone foam cord is so flexible that it can often be used to plug irregularly shaped openings. CRDF Cord is a closed-cell foam structure and will not absorb liquid

TYPICAL APPLICATIONS

Used to create a liquid tight seal in threaded and non-threaded slots, grooves, and through holes

HELPFUL HINTS

- Elongate the cord during application to make insertion easy. Cord will return back to original shape when released and create a liquid tight seal
- To ensure a liquid tight seal, pick a product whose outer diameter (OD) dimension is 3 - 7% larger than the hole or groove that is being masked

CRDS SERIES

CRDS SERIES - SOLID SILICONE CORD

600°F (315°C)

PRODUCT DESCRIPTION

Our Solid Silicone Cord (CRDS) product line is a great solution for sealing off exposed semi-circular cut-outs on machined parts. It can also be used to plug threaded and non-threaded holes. Versatile and easy to cut to length, Solid Silicone Cord is a great product to have for short runs

- Plug exposed channels or grooves on machined parts
- Used to plug threaded and non-threaded holes

- Cuts easily to length
- Color coded for easy identification
- To ensure tight seal, pick a product whose outer diameter (OD) dimension is at least 3-7% larger than the hole or groove that is being masked

SHFS/SHRS SERIES - SILICONE SHEETING

- Can be die cut to almost any shape
- Reusable paint mask
- Solid rubber (SHRS) is ideal for gaskets in automotive sealing application
- Foam sheeting (SHFS) is conformable and lightweight

PRODUCT DESCRIPTION

Our Silicone Foam (SHFS) and Solid Silicone Rubber (SHRS) sheeting product lines are ideal for applications such as gasketing, sound deadening and paint masking during powder coating. Various thicknesses are offered to cover a variety of applications

HELPFUL HINTS

- Silicone foam is more conformable and lighter in weight than solid silicone rubber
- Silicone foam's fabric-like top film is extremely durable and resists powder build-up
- Silicone rubber has a smooth surface where as silicone foam has a textured surface
- Saves labor time over traditional tape masking, and can be reused for additional cost savings
- Foam sheeting is a closed-cell structure and will not absorb water
- Can be die-cut to any shape. Both materials can be supplied with an acrylic adhesive system on one side for permanent applications; call for details

SHMV SERIES - VINYL MAGNETIC SHEETING

176°F (80°C)

- Used in die cut form to match and protect specific surface geometry on sheet metal and formed metal parts
- Eliminates the need for masking tapes with traditional adhesives
- Reusable protection for low temperature finishing needs

PRODUCT DESCRIPTION

Our Vinyl Magnetic Sheeting (SHMV) product line is an attractive alternative to traditional tape masking of flat surfaces. Vinyl Magnetic Sheeting is easy to apply, leaves no residue on the surface and is reusable. Vinyl Magnetic Sheeting can replace the need for crepe tape in many masking applications

TYPICAL APPLICATIONS

When used in die cut profiles, Vinyl Magnetic Sheeting is used to protect flat surfaces on sheet metal. Vinyl Magnetic Sheeting can replace the need for crepe tape in many masking applications, and, through reusability and ease of application, can lower overall masking costs

HELPFUL HINTS

- Vinyl exhibits good chemical resistance properties
- For best results, vinyl magnetic sheeting should be applied to clean, flat, ferrous metal surfaces
- Vinyl magnetic sheeting can be purchased either in raw sheet form or in die cut shapes, depending on application
- Vinyl magnet should be applied to flat surfaces only
- Can be die-cut to any shape - call for details

SHMV SERIES

PART NUMBER	Standard L x W (in)	Standard Thickness (in)	Standard L x W (mm)	Metric Thickness (mm)
SHMV 0015-SHEET	24 X 60	0.060	610 x 1524	1.5

CRSP SERIES - CORK SPACER PADS

- Protect finished products during shipping and storage
- Spacer pads stick without adhesive
- Fast, easy placement and removal
- Inexpensive cork material; reusable
- Parts can be stacked shortly after curing

TYPICAL INDUSTRY USES

Powder Coating, E-Coating, Plating, Anodizing and Wet Spray

TYPICAL APPLICATIONS

Used as a protective spacer between layers of freshly coated material to prevent damage and wear to surfaces

HELPFUL HINTS

A simple system for avoiding paint damage during storage and transportation. The spacer pads are 18 X 18 mm or 20 X 20 mm in varying thickness, and made of natural cork with a 2 mm thick soft polyethylene layer on one side. The pad fastens with a suction effect when lightly pressed against the painted surface. The pads do not leave trace residue after removal and are reusable. We do, however, recommend testing this product first to determine the suitability for its intended paint application

TERMS & CONDITIONS

VISIT WWW.EPSI.COM FOR THE LATEST TERMS & CONDITIONS

MINIMUM ORDER IS \$75 U.S. DOLLARS

PAYMENTS

Payments made by credit card will be processed within one business day. EPSI accepts Visa, MasterCard and American Express. Late Payments are subject to 1.5% (18% APR) on unpaid balances until paid and any collection costs including actual attorney fees. After 30 days of unpaid fees, your account will be placed into suspense and you will not be able to order additional products. In the event of a suspended account, please reach out to your Inside Sales Representative or Customer Service Representative to resolve the issue. Proof of payment is required to clear the suspense. If you wish to establish terms, you must submit to a credit history check. Your current credit health will determine terms length and credit limit with EPSI.

Based on your Partnership Level, you can apply to receive payment term incentives. Payments are to be made within the number of days (based on what you qualify for) after the date listed on the invoice. EPSI accepts payments via Visa, MasterCard, American Express, company check or bank transfer.

If a credit is issued to your account, it will remain open for future purchases on EPSI product only. Credits will be valid for 120 days.

In the event of questions regarding payments of safety stock for a customer who is no longer willing or able to continue with customer-provided forecasting, the customer is responsible for purchase and payment of 90 days' worth of product. Please see Safety Stock Agreement for full details.

SERVICE TERMS & CONDITIONS:

The EPSI Guarantee: Our EPSI Guarantee to you is increased efficiency, reduced per painted part cost, a dedicated account manager and regional support team. It works or you don't pay!

RETURN POLICY

Customer has 30 days from the invoice date to place a claim for return of standard products. This includes if the customer ordered the wrong product, ordered the wrong quantity or if they do not need the product. Products must be returned in new, unused condition. A refund will be issued for claims with products returned within 30 days if paid via credit card.

Claims for return of standard product made from day 31-90 will receive an EPSI store credit once product is received. Products must be returned in new, unused condition. A refund will be issued for claims with products returned within 30 days. This credit will be placed on your account. EPSI store credits can be applied to open invoices upon request. If a credit is issued to your account, it will remain open for future purchases on EPSI product only. Credits will be valid for 120 days.

EPSI store credit will not be issued for claims made and/or products returned after 90 days.

A claim must be placed with your Customer Service Representative (CSR) to return product. Your CSR will issue a RMA # and provide RMA paperwork. This paperwork must accompany the product being returned. If paperwork does not accompany the returned product, we are unable to identify where the return is coming from and no credit will be issued.

There is a 15% restocking fee for any unwanted product from customer. Eligible Partnership Levels will receive lowered restocking fee incentives.

Custom orders may not be returned, unless defective.

If product is defective, EPSI recommends the wrong product, EPSI ships the wrong product or EPSI ships the incorrect quantity, a claim must be placed with your Customer Service Representative (CSR). Your CSR will issue a RMA # and provide RMA paperwork. This paperwork must accompany the product being returned. If paperwork does not accompany the returned product, we are unable to identify where the return is coming from and no credit will be issued.

The product must be received within 30 days of the RMA # being issued. If product is received after 30 days, no credit will be issued and the product will not be returned to the customer.

Once a claim is submitted, EPSI will send you the correct product at no charge to you. Product you wish to return must be in new, unused condition and your request must be made within 30 days of original receipt of goods. If product sent back is not received within 30 days of a claim being submitted or has been identified as "used", you will be charged for the replacement goods.

Custom orders may not be returned, unless defective.

LIABILITIES

In no event shall EPSI be liable, in contract, tort, strict liability or under any other legal theory for indirect, incidental, consequential, special or punitive damages or for loss of profit, revenue or data regardless of whether EPSI was informed about the possibility of such damage. In no event shall EPSI's total liability exceed an amount equal to the sale price actually paid by buyer.

Many factors can affect the use of and performance of a product in a particular application. All products should be tested to determine their suitability for their intended use. Temperatures listed for all products are the highest intermittent temperature that product should be exposed to. These temperatures are higher than the continuous operating temperature for a given material.

When choosing a material for an application where hardness, chemical resistance, weatherability, tear resistance or other such properties are important, EPSI will gladly send samples of our stock materials for your evaluation. For additional material properties, or help in selecting the right material for your job, see "Elastomer Selection Guide" at the end of the catalog on page 126 or contact an EPSI Representative at 1.866.275.3774.
